

# The Next Level of Efficiency and Output

## A Complete Component Solution With Flexible Product Customization

Increase manufacturing speed and output without surrendering quality or added costs. CabiNEXT<sup>TM</sup>, the modular component system from MJB Wood Group, is a multi-product mix of cabinet components delivered to your exact specifications. With a wide range of material and finish options, CabiNEXT provides almost unlimited flexibility at any price point. CabiNEXT lets you focus manpower, time, and resources on other activities without sacrificing quality standards and allows you to increase capacity and grow market share without added capital expense.

### PlySelect™ Hardwood Plywood

A high-value, low-cost material option offering strength and machinability in a variety of component selections available for quick shipping.

- PBD, MDF, or Veneer Cores
- Available in raw, prefinished, or UV finished
- Domestic or imported from Russia, Vietnam, Indonesia and South America
- Includes Beech, Birch, Maple, Oak, Cherry and Alder and others

### Composite Panels

CabiNEXT is a reliable, cost-efficient source for composite panels. Through our domestic and import network of suppliers you can specify exactly what you need while maintaining outstanding price stability and inventory control.

- MDF, PBD, and TFL available
- Cut-to-size, edge-banding and custom machining services

### Cabinet End Panels and Components

CabiNEXT end panels bring the productivity and cost-saving efficiency of outsourced custom manufacturing to your operation. Additional components such as backs, shelves, and toe kicks can also be ordered.

- Available in MDF, PB and hardwood plywood
- Available raw, prefinished, UV finished, TFL or paper laminated
- Birch panels and machined components
- Cut-to-size, routing, drilling and edge-banding services

### Drawer Components

CabiNEXT drawer sides, fronts & backs, and bottoms simplify your procurement, production, and manpower.

- Material options include solid wood, plywood, PBD, MDF, TFL, or laminated
- Available in raw, prefinished, or UV coated
- Assembly available on request
- Domestic or imported from Vietnam, Russia, Indonesia, Malaysia and Mexico

### Door and Door Components

Save time, money, and resources with components that reduce the need for sanding, touch-up priming, and additional handling.

- Paint Grade MDF
  - MDF Poli Door stiles and rails
  - MDF Poli coated insert panels
- Thermal Foil (RTF)
- Hardwood door stiles and rails
  - Available in painted or prefinished hardwood
  - Hardwood plywood insert panels

### Cabinet Face Frames

CabiNEXT Face Frames are an excellent solution for outsourcing some or all of the frame components your production line requires. Realize higher throughput and reduced cost, labor and waste using traditional materials or new material alternatives.

- Produced as cut-to-size parts or fully assembled
- Available in hardwoods, FJ poplar and MDF
- Available in raw, primed, gesso coated or prefinished
- Alternative wood species and custom-match finishing available

# A Full Service Component Solution

**CabiNEXT** is designed to help you bypass the high-cost, low-margin limitations certain parts and processes place on your capabilities. We provide quality-certified sheet goods and components, machined and/or finished to the point in your production where it delivers the greatest benefit. CabiNEXT allows you to manage costs and optimize products, personnel and productivity, by delivering these key benefits.

**Simplified Purchasing and Payback** – CabiNEXT can simplify procurement and reduce part costs with just one call. Our extensive domestic and off-shore manufacturing alliance network makes it easier to adjust order volumes, avoid supply interruptions and maintain cost control.

**Streamlined Production and Labor** – CabiNEXT components bypass in-house fabrication processes which can save you time, manpower and overhead and allow you to free up key production resources to drive manufacturing

**Decreased Waste, Increased Capacity** – Ultimately, CabiNEXT delivers more production in less time. It frees up key personnel and production resources for other higher value activities allowing for increased output from components to final assembly. Whether you have a short-term spike or need capacity for long term growth, CabiNEXT provides the manufacturing flexibility to support you.

**Higher Profits** – With each production step bypassed, CabiNEXT saves you money. We can help your organization optimize efficiency and maximize profitability by increasing potential margins on every sale as well as potential output.

## A Solution Made for You

CabiNEXT offers efficiency and flexibility for any project.

**Substrate** – Our substrate options include hardwood plywood, particleboard, MDF and DL, customized to your needs.

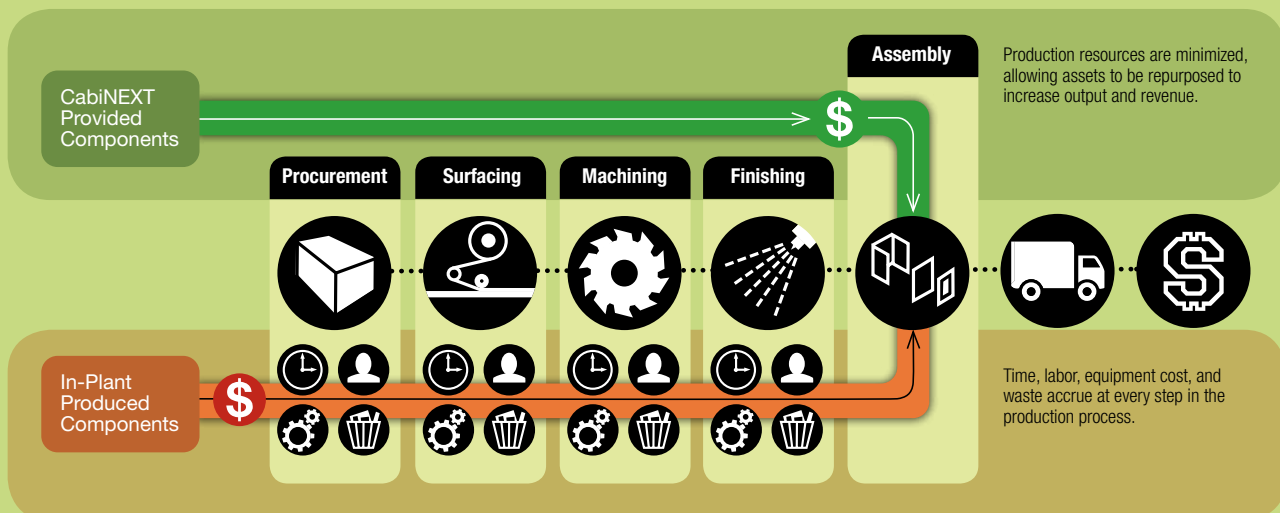

**Laminates and Finishes** – Choose from a variety of wood species in raw, laminated, or veneered surfaces. Components are finished with paint, stain, and UV coating on one or both sides as well as edge banding.

**Machining** – The parts you need can be cut to size, shaped, grooved, drilled, and routed the way you want them. After machining, they are quality certified to your specifications.

**Sourcing** – We partner with raw material suppliers and panel-processing resources domestically and internationally to bring you the materials you need.

**Delivery and Inventory** – Volume, delivery scheduling, warehousing, and inventory management services can be optimized to your needs. From daily deliveries sequenced to match your production schedule to on-site inventory programs with managed stocking levels, our services are customized for you.
