

LVLSelect®

By MJB Wood Group, Inc.

MJB Wood Group is proud to introduce our new LVL Select product line to our extensive portfolio of high-quality wood-based products. MJB was one of the first companies to introduce and perfect the LVL process based on the stringent requirements of the door and window industry. The new product line using our proprietary LVL process includes Gesso Primed Flat Jambs and S4S Boards. The plantation grown Falcata species that we use in our LVL process provides a light weight yet strong substrate and our two-coat priming process provides a consistent finish.

MJB LVL Select Boards and Jambs provide a consistent high-quality primed product solution for the most demanding customer.

LVL Primed Jambs

Sizes

- 11/16" x 3-5/8" to 11/16" x 6-7/8": 6/8 or 8/0

- 9/16, 11/16, 21/32, 23/32, 3/4

Widths

- 1-1/2" through 11-1/4" (2 through 12)

Lengths

- 7' to 17'
- PET

Priming and Layout:

- Double Gesso Coating 3 sides
- Single Gesso Coating back side
- Exterior Gesso Coatings
- Exterior Glue used to adhere veneers
- Note: Interior Use Only

Albasia/Falcata LVL Board/Flat Jamb Properties:

Density: 18.7 lb/ft³- 25 lb/ft³:

Screw holding: 175 to 220LBS:

MOE: 0.87 – 1.01MPSI (side) & 0.72 – 0.87MPSI (face)

MOR: 11600 to 14503 PSI:

MC: 8 – 12%

Albasia Falcata is 100% plantation grown, lightweight, straight grain, but still very strong. It is an easy to work with wood species: it can be machined, moulded, turned and carved. It is a fast-growing species and can be harvested after 5-7 years of planting. Albasia has a high strength to weight ratio making it suitable for numerous applications: Plywood, Pallet Lumber, Wooden Boxes and our MJB LVL Select Primed Boards and Jambs.
